## Front-end Developer

**Front-end Developer** with over **4 years of commercial experience**, specializing in React.js and JavaScript. I have worked on a variety of Web2 and Web3 projects, from outsourcing to startups, developing applications from concept to deployment. My expertise covers UI development, performance optimization and interactive user experiences, ensuring seamless and efficient applications. I thrive in agile environments, collaborating closely with backend developers, designers and product managers to deliver high-quality, scalable solutions. I am a strong problem-solver and team player with experience mentoring junior developers, leading UI architecture decisions and improving development workflows.

## TECH SKILLS

- **Programming Languages:** JavaScript, TypeScript
- **Frameworks:** React.js, Next.js, Vue.js
- **Backend Technologies:** Express.js, REST API, WebSockets
- **State Management:** Zustand, Redux
- **CSS Frameworks:** Tailwind CSS, Bootstrap, Material UI, Styled Components
- **Web3:** Wagmi, Web3 React, MetaMask Integration
- **PM methodology:** Agile (Scrum, Kanban)
- **Tools:** Jira, Google Analytics
- Git, GitHub, GitLab, Vercel, Lighthouse, Vite, Bitbucket, GitLab

## WORK EXPERIENCE

**Voltum** Jul 2024 – Jan 2025  
**Front-end Developer** Kyiv, Ukraine

### Projects:

Voltum Mini App – competitive money games with thousands of players

Crop and Rob - TON farm on telegram

- Developed and launched multiplayer games with real-time interactions, handling thousands of concurrent users
- Designed and optimized game mechanics, ensuring smooth gameplay with WebSocket-based state updates every 250ms
- Implemented advanced UI animations with Framer Motion and optimized rendering, reducing UI lag and improving UX
- Reduced game load time by 50%, using Code Splitting and Lazy Loading for assets and components
- Collaborated closely with backend developers, ensuring seamless data exchange through REST API and WebSockets
- Suggested and implemented features that doubled user engagement and traffic, significantly boosting retention

**Technologies:** React.js, Next.js, TypeScript, Zustand, WebSocket, REST API, Tailwind CSS, Framer Motion, Zod, Axios

**Cowchain** Jun 2023 – Jul 2024  
**Front-end Developer** Kyiv, Ukraine

### Projects:

Retrobridge.io - all chains, single app

PixelTap by Pixelverse Mini App - Real-time crypto game between players

- Integrated Web3 authentication, enabling seamless MetaMask and Trust Wallet support
- Developed a Telegram bot for 30M+ users, enabling token-based referral programs and automated reward systems
- Built a Web3 mini-game with multiplayer competitions, using randomness mechanics for fair gameplay
- Led mentoring efforts for Junior & Trainee developers, conducting code reviews and knowledge-sharing sessions
- Optimized frontend performance, reducing bundle sizes and improving SSR strategies with Next.js
- Implemented real-time transaction tracking, allowing users to monitor blockchain transactions without delays
- Proposed and introduced a technology shift that halved feature development time, improving overall project velocity

**Technologies:** React.js, Next.js, TypeScript, Zustand, WebSocket, REST API, Axios, Material UI, Radix UI, Tailwind CSS, Framer Motion

**Azgard** Jan 2023 – May 2023  
**Front-end Developer** Kyiv, Ukraine

**Project:** Coxit (secure IT solutions), e-commerce websites, interactive mini-games

- Developed multi-user admin panels, improving user management
- Increased product traffic by 200% by implementing an engagement-boosting feature
- Created interactive mini-games, enhancing user retention
- Delivered 3 major projects in 1 month, showcasing strong time management skills

**Technologies:** React.js, Next.js, JavaScript, TypeScript, Zustand, WebSocket, REST API, Tailwind CSS, Framer Motion

Qberg

Markup Developer

Developed modular and reusable CSS components, reducing code duplication and improving scalability

Converted complex Figma designs into pixel-perfect, responsive layouts that matched UI/UX specifications

Implemented a dynamic styling system, allowing rapid UI iterations and theme adjustments

Collaborated with frontend developers, ensuring seamless integration of React-based components into projects

Technologies: JavaScript, Tailwind CSS, HTML

Jan 2023 – May 2023

Kyiv, Ukraine

Freelance

Front-end Developer

Completed 30+ successful projects on Freelancehunt with zero negative reviews

Built complete frontend architectures from scratch, including state management and API integrations

Developed interactive UI animations, leveraging GSAP and Framer Motion for smooth transitions

Integrated complex backend systems, working with REST APIs and WebSockets for real-time applications

Managed direct communication with clients, conducting UX audits and suggesting product improvements

Aug 2021 - Dec 2022

Kyiv, Ukraine

EDUCATION

State University of Information and Communication Technologies, Bachelor’s degree of Cybersecurity2019 – 2023

LANGUAGES

English – C1   Ukrainian – Native   Russian – Fluent
